Aniket Das

Full-Stack Developer

indtekina2@gmail.com | +91-7319461368

GitHub | Portfolio

Professional Summary

Full-Stack Developer specializing in JavaScript, React, Node.js, Express.js, and MongoDB. Experienced in developing and deploying full-stack applications, designing REST APIs, implementing secure authentication, and building real-time communication systems. Delivered a real-world client project featuring business management, billing, inventory, and analytics. Interested in backend engineering, scalable applications, and practical software development.

Technical Skills

Languages	JavaScript, HTML5, CSS3
Frontend	React, React Router, Vite, Tailwind CSS, TanStack Query, Axios, Recharts
Backend	Node.js, Express.js, REST APIs, Socket.IO, WebSockets
Database	MongoDB, MongoDB Atlas
Authentication	JWT, bcrypt, HTTP-only Cookies, Protected Routes
Tools	Git, GitHub, VS Code, Postman
Deployment	Vercel, Render

Projects

A&B Salon and Academy — Real-World Client Project Live Demo

React, Node.js, Express.js, MongoDB, JWT, REST APIs, Tailwind CSS

- Developed and deployed a full-stack salon management system for a real-world business client.
- Implemented billing, invoice generation, customer management, memberships, inventory, staff management, and service management.
- Built business analytics and administrative dashboards to support daily business operations.
- Implemented authentication, protected API routes, and database models for business data management.
- Translated real client requirements into functional software features and deployed the application using Vercel and Render.

Study Tracker — Full-Stack Productivity Application GitHub

React 19, Node.js, Express.js 5, MongoDB, JWT, TanStack Query, Axios, Tailwind CSS 4, Recharts

- Developed a full-stack study and productivity tracking application for organizing tasks and monitoring study progress.
- Implemented JWT authentication using HTTP-only cookies and protected backend endpoints.
- Integrated TanStack Query and Axios for API communication and server-state management.
- Built interactive dashboards and data visualizations using Recharts.
- Designed frontend-backend integration with a maintainable application architecture.

LinkUp — Real-Time Messaging Application Live Demo

React, Node.js, Express.js, MongoDB, Socket.IO, JWT

- Built a full-stack real-time messaging application supporting instant communication and group conversations.
- Implemented JWT authentication, password hashing with bcrypt, protected routes, and user sessions.
- Integrated Socket.IO for real-time messaging and online/offline presence indicators.
- Developed REST APIs and MongoDB data models for user and conversation management.
- Implemented responsive chat interfaces and deployed using Vercel, Render, and MongoDB Atlas.

Portfolio Website — Personal Developer Portfolio Live Demo

React, Vite, JavaScript, CSS, React Router

- Designed and developed a personal portfolio showcasing projects, technical skills, and development work.
- Built reusable React components and responsive layouts for desktop and mobile devices.
- Implemented frontend routing and deployed the production application using Vercel.

Additional Information

- Self-taught developer with hands-on experience building, debugging, and deploying full-stack applications.
- Experienced in translating practical requirements into functional software solutions.
- Interested in backend engineering, API design, real-time systems, and scalable software architecture.
